

OPTITool for the transport logistics

Who we are ...

We are the specialists for trip planning and optimisation. Since 1996 OPTITool develops, sales and implements software solutions regarding the trip planning and optimisation for the complex requirements of various industries. The development of the program, which has its origin in the field of study operations research goes back to 1994. The main team is composed of graduate physicists and mathematicians that are specialised in optimisation. Today, they are still in close contact to the factorial for theoretical physics of the University of Regensburg.

Our solutions ...

Energy industry

mineral oil industry

local/central planning
sales optimisation with OT
MAP and geo referencing

pellet industry

sales optimisation
time space planning and
global optimisation

lubricant industry

check of the stock availability
article management
loading at packed goods

liquid gas industry

tank charging levels
time space planning and
global optimisation

foods

milk industry

periodical standard trips
1 till n-day collections
cluster optimisation

beverage industry

standard trip planning with
various customer groups
global optimisation

bakery industry

stand. trips with time frame
volume calculation
global optimisation

fresh food supplier

standard trip planning
daily based adjustments
global optimisation

disposal

public

waste disposal standard trip
check restrictions
street side
Chinese-Postman-optimisation

privat

standard trip planning
container allocation and
collection
communication to vehicle
computers

curier, express & post services

post

pre- and backlash planning
standard trip planning
Chinese-Postman-
optimisation

safety services

standard trip planning
simulation
geo-fencing

Our references ...

Shell Direct, Shell Austria, TOTAL Deutschland, PRIMAGAZ, CompacTec, OMV, Müller Milch, Danone, Meier (CH), Sternenbäck, Brau Union, Post.at, ...

Your advantage ...

For all our customers we could reach the reduction of expenses (5-15%) and rising effectiveness regarding the working processes.

Our interfaces ...

The solutions of OPTITool simply can be connected to ERP systems, stock- or tank-measuring systems or vehicle computers.

We would be pleased to inform you in a personal counselling interview about the individual possibilities using OPTITool in your company.

OPTITool
optimize your business
